Dallas, TX | 214-830-2432 | wcannon83@gmail.com

Hospitality Technology & Business Systems Leader | 15+ Years Multi-Location Restaurant Experience

PROFESSIONAL SUMMARY

Results-driven technology and operations leader with 15+ years of hands-on experience implementing and managing business systems across multi-location restaurant and hospitality environments. Deep expertise in Aloha POS, Restaurant365, Microsoft 365, network infrastructure, online ordering platforms, and payment processing integrations. Proven ability to lead complex system deployments, manage vendors, and work cross-functionally with ownership, operations, and accounting teams. Highly proficient in AI-assisted development and workflow automation — leveraging tools like Anthropic Claude to accelerate delivery and solve problems faster than traditional methods.

CORE COMPETENCIES

Aloha POS Administration & Integration • Restaurant365 (R365) • Microsoft 365 Tenant Administration • Network Infrastructure & Systems Integration • Online Ordering Platform Deployment • Payment Processing Systems (NCR, Stripe, Square) • Multi-Location Operations Management • Vendor Management & Procurement • Cross-Functional Team Leadership • AI-Powered Workflow Automation • Salesforce CRM • Data Analysis & Reporting

PROFESSIONAL EXPERIENCE

Founder & AI Technology Consultant | CannonCodeConnect *March 2025 – Present*

- Build custom technology solutions for small businesses and entrepreneurs using AI-assisted development (Anthropic Claude), including full-stack web apps, CRMs, operational dashboards, and automation tools.
- Delivered a full three-portal SaaS CRM for a Dallas-based service company — client, operator, and admin portals — with Stripe payment integration, invoicing, payroll exports, and real-time scheduling (React, Vite, Supabase).
- Produced comprehensive operational improvement plans for Paris hospitality clients, including POS controls, cash handling systems, inventory management protocols, and 30-day implementation roadmaps.
- Completed Anthropic's AI training curriculum; certified proficient in AI-assisted development, prompt engineering, and deploying Claude-powered solutions for business clients.
- Consult hospitality businesses on technology stack selection, system integrations, and digital marketing discoverability including Google Business Profile, reservation platforms, and social media.

Operations Director | Prestige Sales & Marketing *June 2023 – February 2025*

- Directed nationwide sales and marketing operations fulfilling government contracts, managing 250+ remote agents across multiple states.
- Oversaw inventory tracking, weekly payroll processing, and scheduling systems for a high-volume distribution operation (3,000+ units weekly).
- Developed tracking and reporting infrastructure using automated spreadsheets to improve operational visibility and team accountability.

Project Manager – POS Integrations | me&u USA *March 2022 – May 2023*

- Managed end-to-end POS system integrations connecting Aloha, Micros, and other platforms with the me&u QR order and payment platform across U.S. restaurant accounts.
- Set the fastest integration speed in U.S. company history — 11 days from handoff to activation — through disciplined project management and technical troubleshooting.
- Oversaw all stages of account integration including analytics configuration, payment processing setup, customer management, ongoing maintenance, and Account Manager handoff.
- Averaged 2–3 successful account activations per week; tracked all client interactions and pipeline in Salesforce.

Founder & Operating Owner | Cedar & Vine – Community Kitchen + Cocktails *April 2016 – July 2020*

- Founded and launched a full-service neighborhood restaurant in Dallas, personally overseeing technology selection, POS configuration, payment processing, online ordering setup, inventory management systems, and network infrastructure.
- Achieved \$185,000+ in sales in the first month of operation; maintained average net profitability of 10% over the first seven months.
- Managed all vendor relationships including POS vendors, payment processors, and technology service providers.
- Trained 50+ staff across front- and back-of-house operations; built and managed social media presence across all platforms.

Founder | Smart Home Systems & Cannon Drones

September 2015 – April 2016

- Designed and installed home automation systems (lighting, door lock, electrical) using Z-Wave and smart home platforms; provided aerial photography services for commercial real estate using DJI systems.

Operating Partner | LH Eats, LLC & {33} Restaurant Group, LLC *September 2008 – September 2015*

- Managed daily technology and operations across six restaurant concepts with 125+ employees, including full responsibility for POS systems (Aloha, NCR RUN), payment processing, financial reporting, and inventory management.
- Administered Aloha POS across multiple restaurant locations — configuration, updates, troubleshooting, staff training, and integration with back-office reporting and accounting systems including Restaurant365.
- Designed and implemented an online ordering system in 2012 across four Palio's Pizza Café locations — one of the earliest multi-location restaurant online ordering deployments in the Dallas market.
- Managed network infrastructure across all locations including POS terminals, payment devices, kitchen display systems, surveillance, and AV equipment.
- Led build-out and launch of Taverna Rossa, growing revenue from \$1.5M in year one to \$2.7M by year three; grew Palio's Pizza Café Frisco from \$700K to \$1.3M over seven years.
- Handled all Microsoft 365 administration including user management, licensing, security settings, and email infrastructure for the restaurant group.

EDUCATION

Bachelor of Business Administration (BBA) | St. Edward's University, Austin, TX *Cum Laude* | GPA: 3.84

Dean's List • Graduated with Honors
